# OUR APPROACH

ACCOMPANYING YOU UNTIL TAKING THE LEAD ON YOUR SOLUTION

DAP is xHub's **own** framework, that defines ways of working within our delivery/engineering team, and its interaction with the outside world (Customer, PO, CSL). DAP illustrates the framework for a healthy collaboration inside the delivery team, while delivering a state-of-the-art software project on time and in budget, meeting customer expectations.

Our aim here is not to blindly copy available processes. Instead, we hope to define our own system, that answers our constraints while we are rapidly growing as a company.
